

Our Uganda facilities are well equipped with testing and manufacturing equipment

Integrated Testing Capability Within Ugandan Factory & Service Centre

- No-load losses & current
- Load losses, impedance voltage & short circuit impedance
- Noise level test
- HV & LV winding resistance
- Temperature rise test
- Transformer oil test
- Dielectric tests
- Induced overvoltage
- Sealing effectiveness
- Voltage ratio & vector relationship

- Isolation resistance
- Withstand test of Impulse voltage & power freq

Mobile testing equipment

- HV & LV winding resistance
- Dielectric tests
- Transformer voltage ratio
- Surge arrester test
- Resistance to ground
- Power frequency test
- Oil purifier

Production & Repair Equipment Installed (Phase 1 = 500,000 kVa capacity)

- Winding and rolling machines
- Automatic oiling machine
- Corrugating machine
- Circular sheer
- Bus bar bending machine
- Name plate printer
- Vacuum oil purifier

- Electrical heating dryer
- Vacuum drying tank
- Radial drilling machine
- Bench drilling machine
- Grinding machine
- Wood working machine
- Other (e.g. compressors)
